Al-Mabhouh enters the lift with a member of hotel staff. Two Mossad agents follow disguised in tennis outfits

All four take a taxi to their hote. Folliard orins at the desk clerk as she checks in. As the hours and minutes to murder tick away, she is seen flouncing around a luxury shopping mall apparently without a care in the world, and returning to the hotel laden. with carrier bags.

She even smiles flirtatiously and tosses her brown pony-tail towards her co-assassins, before she dons a wig and reappears with her hair in a thick, centreparted bob.

Throughout the afternoon, the others fly in. Technical surveillance has shown that they never made direct phone calls to one another (instead they dialled intoa communications centre based in Austria using highly encrypted cyphers.

The task of the first wave is surveillance, and they change their appearance accordingly. When next we see Kevin Daveron, for example, he, too, is wearing a thickly-quiffed wig and is completely unrecognisable from the bald, stubbled man we saw before

At 3.20pm we get the first glimpse of the victim as he goes through customs. Members of the surveillance team trail him from the airport to the Al-Bustan Rotana Hotel

I work on the VIDI-project Logics for Intelligent Interaction\* Expressivity and Succinctness funded by the Netherlands Organization for Scientific Research (NWO)

The project focussus on one of the prominent themes in logic today intelligent interaction which occurs in any social situation. There is a multitude of logical theories in this area to such an extent that for one and the same subject there is more than one approach. There is a great need to establish whether elternative approaches actually provide fundamentally different perspectives, or whether the differences are merely superficial. By focusing on the expressivity and succentiness of these logics, possible differences in their underlying conceptual frameworks are revealed, thus advancing our understanding of these conceptual frameworks and thereby of intelligent interaction itself.

From 2006 to 2009 I worked on the VENI-project Developing dynamic epistemic logic guided by old peradoxes and new techniques

I am currently professor by special appointment on the chair of Logic and Argumentation established by the Stichting Groninger Universiteitsfonds at the Department of Theoretical Philosophy at the university of Groningen I studied philosophy in Groningen and did my master's thesis on the so-called Monty Hall Diterrima under the supervision of Enk Krabbe and Rineke Verbrugge. This led to a PhD. project in the computer science department in Graningen under the supervision of Gerard Renards and Rineke Verbrugge. I finished my dissertation on probabilistic dynamic epistemic logic in 2003. After my PhD I worked as a postdoc at the Department of Philosophy on further topics within dynamic epistemic ogic and related subjects. When I read the brochure of the logic programme before I applied here, I was impressed by the remark of one of the students, who wrote that the logic programme was smalled in a country with maybe the In gheat density of logic lans in the world in midglined the Though (all least outside of the LLC buildings) it is not quite like this, the logic programme and Amsterdam exceeded all has of finding an ideal environment for delving deeper into the links between logic, language and computation, while esting people from all one into the world at the same time. He was the first one who left the crime scene in Dubai and took the airplane to Europe.

I personally think that this man was the big boss and the leader of the team who gave them the instructions.
